

The Maoz lab is looking for a full-time position as **research associate\ lab manager** (at the Department of biomedical engineering and Sagol School of Neuroscience).
Our lab is developing in vitro tools (concept known as Organs-on-a-Chip) to study human physiology (focusing on the brain) <https://www.maozlab.com/>

Requirements:

- Ph.D in life science or equivalent
- Expertise with molecular biology (cell culture, immunohistochemistry, Elisa, etc.)
- Back ground in neurology (preferable but not a must)
- High professional skills and the ability to work in a team
- High organizational skill and the ability to lead projects
- Passion for science
- High motivation

So if you are interested in leading and supporting cutting edge research projects in a fun working environment and to be part of our team please contact:

Bmaoz@tauex.tau.ac.il
