

R&D Technical Project Manager

Careers that Change Lives

Engineers are indispensable to achieving our Mission. That's why we empower you to bring the best of your experience to bear on our market-leading portfolio of innovations. Apply your existing skills and develop new ones, with the training, mentorship and the guidance you need to continue to develop your expertise.

A Day in the Life

As a Project Manager in our R&D Department you will be responsible for the execution and management of R&D sustain projects.

You will oversee the planning and implementation, lead technical decisions and track projects while delivering goals, in time and quality, under project constraints.

As part of your day to day you will:

- Manage R&D Projects from concept phase to complete transfer to production
- Coordinate the development, verification, and documentation of the R&D projects according to regulatory and quality standards and design control systems.
- Define project requirements.
- Take technical decisions in collaboration with functional groups.
- Develop and execute project plans to satisfy milestones, budget and deliverables deadlines.
- Responsible for the execution of R&D tasks related to NPI and sustaining projects.
- Lead design change projects end to end from feasibility to implementation in the field.
- Lead matrix activities with Regulation, Clinical, Engineering, DQA, OPS -QA.
- Create and maintain DHF per product.
- Track and communicate project status, plans, risks, timelines, and budget on a weekly or ad-hoc basis.
- Prepare for and chair project meetings, coordinate and prioritize R&D cross-function progress, and generate periodic progress reports.
- Participate in risk and hazard management activities, design verification and validation and design transfer.

Must Haves

- BSc in Mechanical, Electrical, Industrial or Biomedical Engineering
- 3 years+ experience in design, development and project management of medical devices.
- Experienced in applying various project management tools for tracking development projects against planned budgets and timelines.
- Solid understanding of medical device design controls, standards, and regulations including ISO 13485 and 21 CFR 820.
- Strong communication skills, great inter-personal skills.

Nice to Haves

- Project management qualification - an advantage.
- Master's Degree in engineering or MBA – an advantage.

About Medtronic

Together, we can change healthcare worldwide. At Medtronic, we push the limits of what technology, therapies and services can do to help alleviate pain, restore health and extend life.

We challenge ourselves and each other to make tomorrow better than yesterday. It is what makes this an exciting and rewarding place to be.

R&D Technical Project Manager

CAREERS
THAT
CHANGE
LIVES

We want to accelerate and advance our ability to create meaningful innovations - but we will only succeed with the right people on our team.

Let's work together to address universal healthcare needs and improve patients' lives. Help us shape the future.

Whatever your specialty or ambitions, you can make a difference at Medtronic - both in the lives of others and your career. Join us in our commitment to take healthcare Further, Together.
